

NEW!

TREND-SETTING: INNOVATIONS 2025

From March 2025, weinor will be offering you a wide range of innovative product developments. Look forward to even more easy to install products and impress your customers with sophisticated outdoor solutions for happy moments at home!

weinor

Awnings Patio roofs Glasoasen®

NEW!

That's how to impress your customers!

- **Reliable quality** at attractive prices
- **Additional glare and privacy protection** with the Valance Plus option
- **Enjoyment outdoors even in the evening** with the light bar option
- **Long-lasting functionality and beauty** with the safety shield and metal valance options

Topas II – open awning to suit personal tastes

We have now made the entry-level awning even better in terms of technology and design and equipped it with more options.

The Topas II can be personalised to suit individual needs or tastes with top profile, Valance Plus, light bar and metal valance options.

The technical highlights include switching to the OptiNut roller tube that ensures better / more consistent rolling behaviour. The folding arm with breakover joint and wind lock safety device ensures the awning opens and closes evenly. The stronger thrust support ensures more arm stability, so wind category 1 is possible for wind force 5 on the Beaufort scale for all awning sizes.

With Topas II, you therefore have the opportunity to now offer your customers more functions and benefits even with the entry-level awning.

NEW!

BiConnect

CONTROL UNIT

With the weinor smart home control unit for sun and weather protection systems, your customers now have even more freedom of choice! In addition to Somfy io, weinor products can now also be controlled using the BiConnect app and BiConnect smart home box – in combination with the Matter interface standard. So you can offer your customers more convenience and control than ever before when automating their home technology!

Smart operation with the weinor BiConnect app

The weinor BiConnect app combined with the Matter smart home box allows for the smart operation of the weinor BiConnect receiver even on the go using any smartphone via the Matter smart home connection. Because compatibility with the Matter technology also makes control possible across systems (Apple HomeKit, Google Home, Amazon Alexa, Samsung SmartThings).

That's how to impress your customers!

- **Easy to operate** awning and accessories using one single app
- Thanks to the **Matter smart home interface**, all weinor products with BiConnect radio can be integrated into other control apps and voice assistants
- **New and older BiConnect receivers** (up to 2013) can be integrated
- **Easy programming of the BiConnect Box** using the familiar keyboard shortcuts

A large, modern two-story house with a glass-enclosed patio and a swimming pool. The patio is covered by a large, dark-framed glass roof system. The house has large windows and a balcony with a glass railing. The pool is in the foreground, and there are some plants and a small garden area.

NEW!

That's how to impress your customers!

- **Large surface protection from the weather** for larger outdoor areas using coupled systems
- **Modular expandable system** with undermounted sun protection, glass sliding doors, lighting and heating system
- **Attractive design** with a seamless look

Coupled Terrazza Sempra – size matters!

Usable outdoor spaces are growing – and so is the need for large surface protection from the weather.

By popular request, weinor will soon be offering you the timeless Terrazza Sempra patio roof in an extra-wide version with middle posts. Look forward to a patio roof system up to 14 m wide instead of the previous 7 m limit. The XXL systems can be ordered easily and securely through the weinor E-Shop. With this extra-wide design, weinor is offering you the opportunity to approach new customer groups.

Like all weinor patio roofs, the Terrazza Sempra system in XXL format provides potential for additional profitable sales with various extensions such as lighting and sun protection.

AWNINGS

Awnings from weinor have stood for maximum durability, outstanding functionality and aesthetics that spark customer interest for decades. But we are not satisfied with that: We develop our awnings further – for even more customer satisfaction and installation in no time at all.

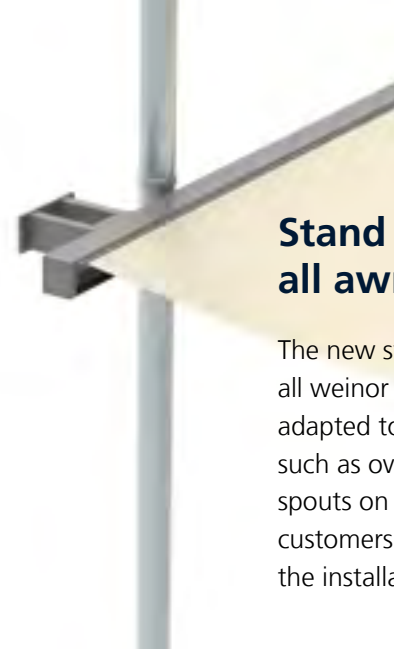

NEW!

Kubata with higher installation allowances

To make the installation of the Kubata easier, weinor has extended the installation allowances on the back plate. As a result, the Kubata and back plate can be really easily slid on and readjustment is no longer necessary.

Stand off bracket for all awnings

The new stand off bracket is suitable for all weinor awnings. It can be intelligently adapted to special installation conditions, such as overhangs, insulation or downspouts on the house wall. For your customers, this means they can plan the installation however they want.

Cleaning and care set for powder-coated surfaces

The cleaning and care set was specifically developed for cleaning and refreshing heavily-used powder-coated aluminium profiles – providing surface protection for up to 2 years. Inspire your customers with this professional set for an all-round clean product!

A modern rooftop terrace featuring a large pergola awning with white slats and dark brown beams. The terrace is furnished with a grey sectional sofa, a coffee table, and several patterned and solid-colored throw pillows. A small fire pit is visible on the right side of the terrace. The view from the terrace shows a cityscape and a body of water under a blue sky with scattered clouds.

PERGOLA AWNINGS

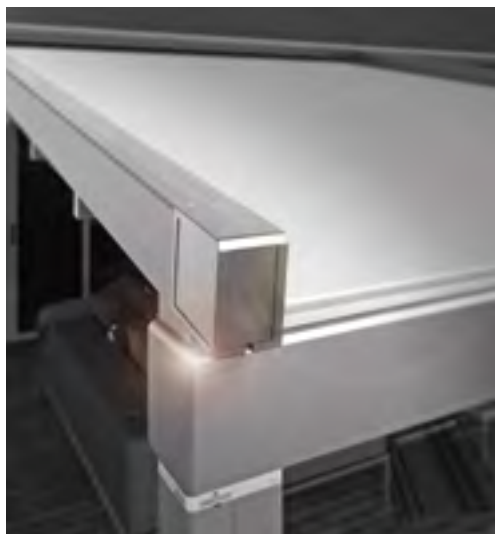

With a pergola awning from weinor, you are offering your customers a flexibly protected outdoor area that can be expanded with modules to suit their taste. Offer your customers even more options for operation and look forward to simple, fast installation!

NEW!

All-round improved weinor PergoTex II

The revised weinor PergoTex II now offers a number of advantages. For example, any allowances can be compensated for better during installation as the carriage can now be adjusted laterally. The support channel is now closed at the top. This protects the mechanism from rain water.

Plaza Viva: Valance Plus with solar drive

The Plaza Viva Valance Plus is now also available with a convenient solar drive, which works with Somfy io technology and is integrated into the front profile. The solar module can be mounted on the front or top of the front profile. Your customers now have the choice between crank drive and solar drive. The wireless solar drive can be installed or retrofitted quickly and easily.

LOUVRED ROOF

Artares has successfully established itself on the market. No wonder: We are hard to beat when it comes to the simple and fast installation of louvred roofs. Now we've made more improvements to make it even easier for you and your customers.

**NEW!**

Post length on request

From now on, you can specify each post length separately in the weinor E-Shop. This means faster installation, as they no longer have to be cut to size on site during installation.

Faster installation thanks to prepared profiles

In future, you can choose the post opening side (centre/wall) when you order vertical sun protection and glazing elements for Artares. The sun protection is then prepared accordingly for turned posts.

Other wall connection versions

You can now customise the profiles for your E-Shop order to suit the local installation situation and just a partial wall connection is also possible.

User-friendly automatic weather system

The Artares automatic weather system has been greatly simplified, complex louvre circuits have been removed. What remains are useful functions for reliable protection against the rain, wind and sun as well as the option for users to deliberately disable the automatic system completely. This is practical, for example, if the louvred roof is to remain open during the winter holiday to prevent snow from accumulating.

Louvre profile with top water drainage

The louvres now have larger grooves in them for improved water drainage so the water flows off more efficiently. What's more, the louvres stay clean for longer and blockages are hindered. When opening the louvres, residual water can run into the louvre grooves more effectively thanks to the rounded shape. This reduces the amount of water dripping onto the space below.

Universal interface for on-site control of your choice

weinor has developed a universal interface so that Artares can be operated with almost all BUS controllers. You get a pre-wired louvred roof without control components and can use the wiring for on-site controls such as KNX or Loxone. Your benefit: The high level of compatibility allows your customers to integrate a variety of systems, regardless of the manufacturer.

GLASS PATIO ROOFS

Proven design for many years – check! Great durability – check!

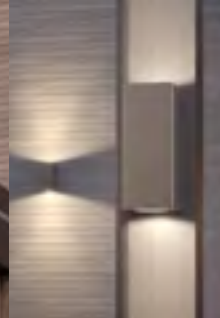

Award-winning design – check! Because we are convinced that good things can be made even better, we are now offering your customers even more design options!

NEW!

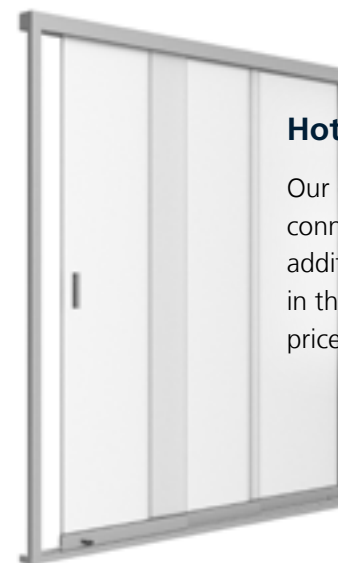

Spot on: the LED accent light

Your customers can create interesting light effects on their weinor patio roof, house facade and in the garden with the LED accent light – making it ideal for add-on sales. With its high-quality coating in more than 200 colours, it matches the weinor outdoor product perfectly.

Hot prices for w17 easy!

Our glass sliding door systems' wall connection profiles are no longer additionally costed - they are included in the new price list. Enjoy an average price saving of 3.5%.

Selling with mood lighting

There's now dimmable warm white lighting with LED strips (only with Somfy io) for all those who appreciate a simple light on their patio roof. As usual, it is integrated into the roof support. If you want to stage the outdoor area for your customers to create a specific mood, choose the ambient lighting with a large range of dimmable coloured light.

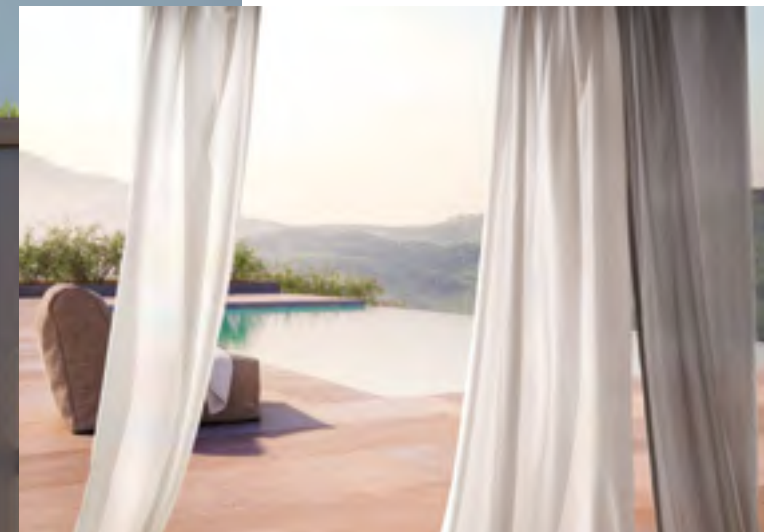

w50-c: new stainless steel handles for windows and doors

We've given the window and door handles for w50-c an update. They now shine in the finest stainless steel and impress your customers with their high-quality look.

LOOKING AHEAD

Outdoor curtains

That's how to impress your customers!

- **In-house fabric collection** with six timeless aesthetic colour nuances for every lifestyle
- **Long-lasting functionality and beauty** thanks to high-quality outdoor curtain fabrics and corrosion-free components
- **Additional glare and privacy protection** for basic protection from prying eyes, the low-lying sun and draughts (ideal behind glass doors)
- **Effortless operation** thanks to smooth running stainless steel rollers
- **Can be removed in no time at all** for a delicate wash at 30° or fast storage over winter
- **Ideal behind glass** (no fluttering etc.)

Homeliness that draws customers

Another highlight awaits you during the year: The new outdoor curtains make the weinor louvered and patio roofs more attractive for your customers with their homely flair and stylish aesthetics. High-quality, extremely weatherproof materials score with long operating life. They can be used ideally in combination with weinor glass sliding elements. Thanks to unproblematic installation of the running rail, revision profile and curtain rings, you save time and money. The outdoor curtains can also be easily added at a later point in time. This gives you the opportunity for lucrative additional business.
